

## Culture Sociology

### SYMBOLS

Culture was defined earlier as the symbols, language, beliefs, values, and artifacts that are part of any society. As this definition suggests, there are two basic components of culture: ideas and symbols on the one hand and artifacts (material objects) on the other. The first type, called nonmaterial culture, includes the values, beliefs, symbols, and language that define a society. The second type, called material culture, includes all the society's physical objects, such as its tools and technology, clothing, eating utensils, and means of transportation. These elements of culture are discussed next.

Let's look at nonverbal symbols first. A common one is shaking hands, which is done in some societies but not in others. It commonly conveys friendship and is used as a sign of both greeting and departure. Probably all societies have nonverbal symbols we call gestures, movements of the hands, arms, or other parts of the body that are meant to convey certain ideas or emotions. However, the same gesture can mean one thing in one society and something quite different in another society. In the United States, for example, if we nod our head up and down, we mean yes, and if we shake it back and forth, we mean no. In Bulgaria, however, nodding means no, while shaking our head back and forth means yes! In the United States, if we make an "O" by putting our thumb and forefinger together, we mean "OK," but the same gesture in

certain parts of Europe signifies an obscenity. “Thumbs up” in the United States means “great” or “wonderful,” but in Australia it means the same thing as extending the middle finger in the United States. Certain parts of the Middle East and Asia would be offended if they saw you using your left hand to eat, because they use their left hand for bathroom hygiene.

## LANGUAGE

Perhaps our most important set of symbols is language. In English, the word chair means something we sit on. In Spanish, the word silla means the same thing. As long as we agree how to interpret these words, a shared language and thus society are possible. By the same token, differences in languages can make it quite difficult to communicate. For example, imagine you are in a foreign country where you do not know the language and the country’s citizens do not know yours. Worse yet, you forgot to bring your dictionary that translates their language into yours, and vice versa, and your iPhone battery has died. You become lost. How will you get help? What will you do? Is there any way to communicate your plight?

As this scenario suggests, language is crucial to communication and thus to any society’s culture. Children learn language from their culture just as they learn about shaking hands, about gestures, and about the significance of the flag and other symbols. Humans have a capacity for language that no other animal species

possesses. Our capacity for language in turn helps make our complex culture possible.

## NORMS

Cultures differ widely in their norms, or standards and expectations for behaving. We already saw that the nature of drunken behavior depends on society's expectations of how people should behave when drunk. Norms of drunken behavior influence how we behave when we drink too much.

Norms are often divided into two types, formal norms and informal norms. Formal norms, also called mores (MOOR-ayz) and laws, refer to the standards of behavior considered the most important in any society. Examples in the United States include traffic laws, criminal codes, and, in a college context, student behavior codes addressing such things as cheating and hate speech. Informal norms, also called folkways and customs, refer to standards of behavior that are considered less important but still influence how we behave. Table manners are a common example of informal norms, as are such everyday behaviors as how we interact with a cashier and how we ride in an elevator.
