Q1 cells of squamous epithelium are. — 21

Monday

- (i) Tall with elongated nuclei
- (ii) cube-like

Q1D Flat tile-like

Q1E columnar or cuboidal in shape.

Ans 1 - (ii)

Q2 cells of germinal epithelium are

- (i) ciliated
- (ii) columnar
- (iii) squamous
- (iv) cuboidal

Ans 2 - (iv)

Q3 Which type of epithelial cells repair injured skin. —

- (i) Neurosecretory
- (ii) columnar
- (iii) cuboidal
- (iv) squamous

Ans 3 - (iv)

Q4 The parietal lining of the coelom is formed of —

- (i) ciliated epithelium
- (ii) squamous epithelium
- (iii) columnar epithelium
- (iv) glandular epithelium

Ans 4 - (ii)

Q5 ciliated epithelium is found in

- (i) Vagina
- (ii) intestine
- (iii) stomach
- (iv) nasal chamber

Ans 5 - (iv)
