Q) Haversian canals are found in -

- (i) Bone (ii) Liver

(iii) Alementary canal (iv) Diaphragm

Ans 1 - (i)

Q) Cells of bone are -

(i) Fibroblasts (ii) Chondroblasts

(iii) Osteoblasts (iv) Histioocytes

Ans 2 - (iii)

Q) Cells of cartilage are -

(i) Osteocytles (ii) Chondrocytes

(iii) Pinnacocytes (iv) Osteocytes

Ans 3 - (ii)

Q) The strongest cartilage is -

(i) Hyaline cartilage (ii) Elastic cartilage

(iii) Fibrous cartilage (iv) None

Ans 4 - (iii)

Q) A bone is distinguished from cartilage by the presence of -

(i) collagen (ii) blood vessels

(iii) Lymph vessels (iv) Haversian canal

Ans 5 - (iv)

Q) Cartilage is produced by -

(i) Osteoblasts (ii) Fibroblasts

(iii) Epithelium (iv) chondrocytes

Ans 6 - (iv)
